UFGA - 205
2 April 1962

Chief, Task Force/W
Chief of Station, JMWAVE

Operational/GYROSE
FAL/Vertice Tres

05

1. On 31 March 1962 [Alberto Mariano Parejon Cardenas, A 12895479], born 11 December 1933, a bank employee, Miami address: [4901 NW 18th Ave.], no telephone, was interviewed. 10

2. Source said he was a member of SAC, FAL and Vertice Tres ("The Third Position").

3. Source said that SAC (Salvar a Cuba) was destroyed by Cuban security forces.

4. Source said that FAL (Fuerza Anti-Comunista de Liberacion) is well organized, the best organized being the forces in Pinar del Rio Province. He said that FAL has some arms and ammunition, and is an action type group, conspiring to provoke an uprising and cutting off communications. Source was reluctant to name any FAL contact, but finally named 06 [Rene Parejon Perez] as a contact man. He said that he could arrange bona fides with Parejon, and he was told that perhaps in the future someone would call upon him and introduce themselves as "amigos de Roberto" and discuss this in further detail. He agreed. He said that some months ago the FAL sent out microfilmed maps showing sites for landing arms and also its proposed caching sites, but he did not know to whom this information was passed.

MR Pursue all the time to transfer its documents'

5. Source said that he was also associated with Vertice Tres, and described this organization as being composed of intellectuals and professionals. Its mission is not clear because as he described it one of the functions is to explain the horrors of the Communist system to the masses by the adoption of a third position. Vertice is also interested in more subtle approaches, such as industrial slowdowns and sabotage. The emphasis, however, appears to be on propaganda and he said Vertice is on the point of obtaining a radio plant. He was asked if this was a "pirate radio", but he replied no, that it would remain on the air so that it could be heard. When asked about the DFing problems, he said he was told by an engineer who is working on this project that it was a "Delta System Radio" and they would not have to be afraid of DFing. (This does not make sense, but it was all the source knew on this subject.)

6. Source said that Vertice needs supplies, such as Minox cameras, but he would not or could not give the name of a Vertice contact in Habana.

He said there/

31BR

He said there is a Vertice contact in Miami, Gerardo (lnu) and although he did not know the lastname or address of Gerardo, he was going to try and locate him. He was again reminded of the "amigos" who would call on him for this information.

06.08

7. Source said that before he left Cuba he met with Maggio Carrillo, the niece of Justo Carrillo. She told him that Justo sent in a message saying "Be careful with Flavio." 06 Maggio asked the source to get in touch with Justo and tell him that if he had derogatory information on Flavio he should send the details. 06 She thought Justo's message was confusing. Source said that "Flavio" is the war name for Evelio Duque who also uses "Frank" and "Manolito." Source said that it is believed that the name Evelio Duque is in itself a war name.

06

8. Source identified Arturo Colri, an employee of the National Bank, Agencia 4-10-40 , Linea y O Vedado, Habana, as a self-admitted member of G-2. Arturo is about 32 years old, white, stocky (about 190 pounds), 5'8" tall, white, black hair and has a large mustache. He was formerly the handyman at the bank, but because of his G-2 position he is now a man of prestige and catered to by all.
